November Demonstration will be given by St. Petersburg Artist, Nathan Beard.

St. Petersburg artist Nathan Beard employs a variety of processes to achieve complex, multi-layered paintings, drawings and collages inspired by the human conception and experience of Space-Time. He draws influence from the density and variety of Floridian flora, as well as chaos theory and fractal geometry.

His most current project maps 6 generations of his parental, married and step families, and re-envisions the family-tree as a vine by plotting people as interweaving lines moving through space and time and not generational points connected to each other with branches.

The Colorado State University graduate is represented locally by ARTicles Art Gallery and in Japan by agent Noriko Kuehn. Nathan serves as Curatorial Assistant at Dunedin Fine Art Center, as Preparator for Scarfone/Hartley Gallery (University of Tampa), as Independent Art Installer for private businesses and residences throughout Tampa Bay, and as Independent Curator of CONSTRUCT, a traveling exhibition. He has served as juror for the Melbourne Art Festival, and for exhibitions at Tampa Regional Artists and Art Uptown Gallery (Sarasota).

Nathan is pleased to have the opportunity to give a PowerPoint presentation to the Treasure Island Art Guild. Beginning with some background to his work, he will delve into how he makes it and into some of the inspiration behind its creation. Nathan will also talk about fusing the abstract with the representational, his work's ties to Japanese ceramics, and his continual inquiry into questions of origin and the limits of human will.
